How do I add/open a server port on Pterodactyl?

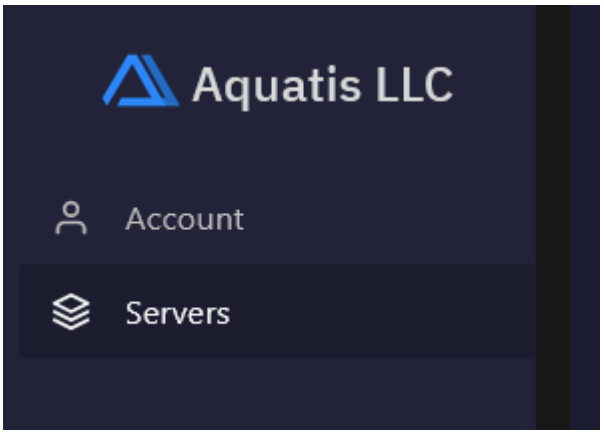

Step 1

Navigate to Pterodactyl panel's login screen and **Login**.

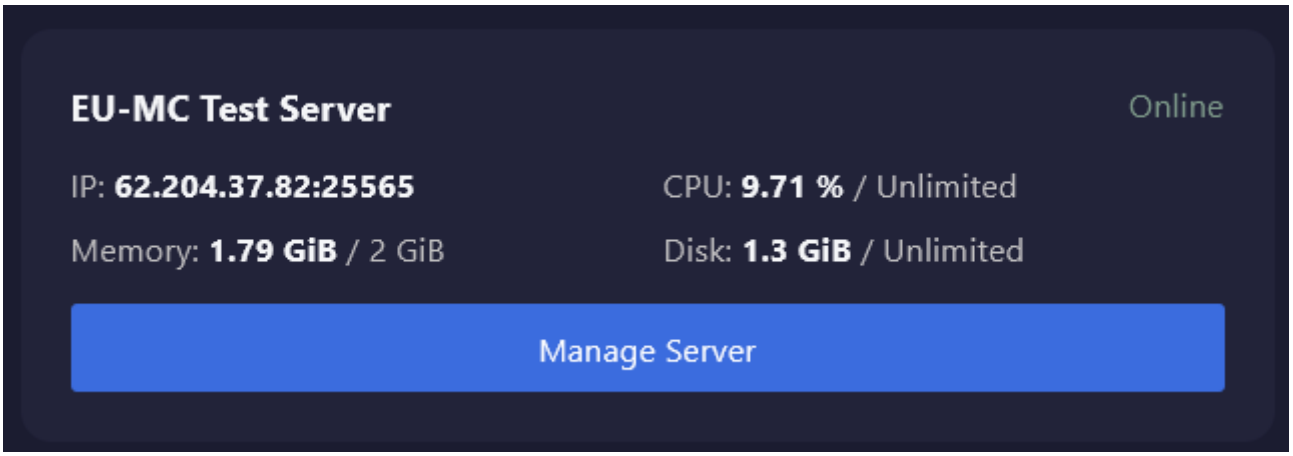

Step 2

Navigate to the **Server** section on the left side navigation.

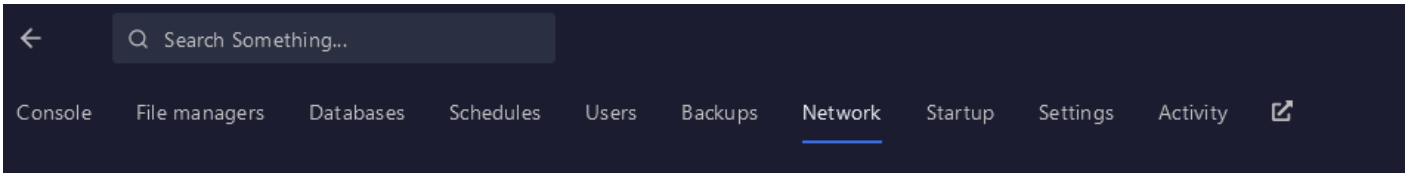

Step 3

Navigate to the server you wish to manage, select the **Manage Server** button.

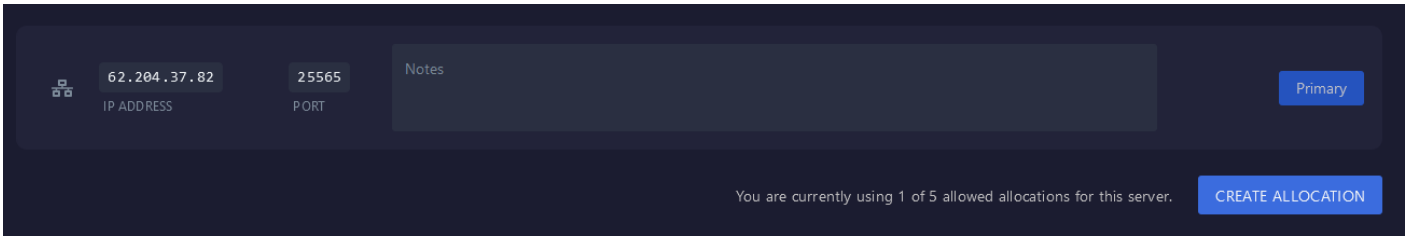

Step 4

On the top navigation, select the **Network** text to manage the networking for your server.

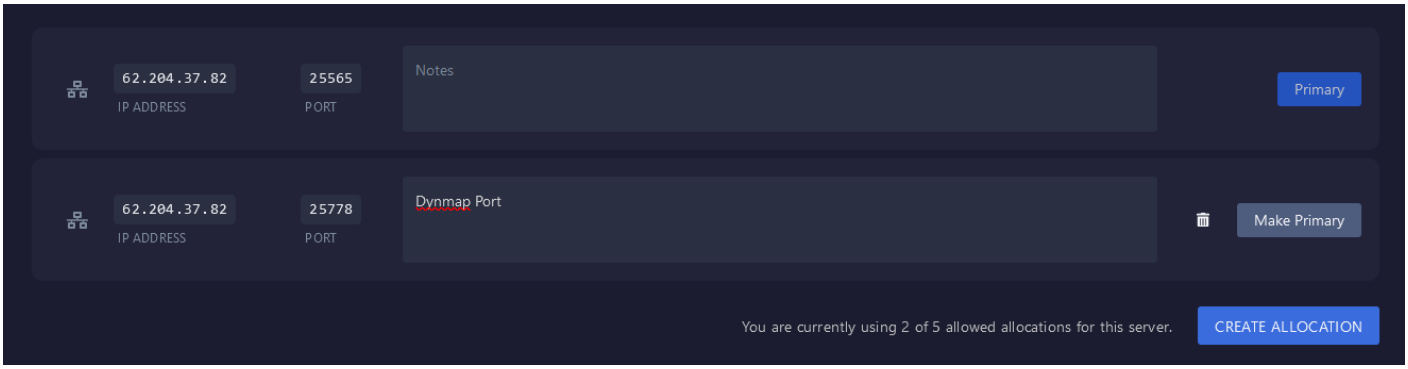

Step 5

Select the **Create Allocation** button to create a new port allocation for your server.

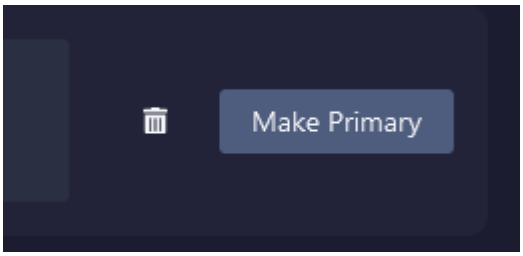

Step 6

Type **Notes** into the notes box to create a reminder of what you are using that port for.

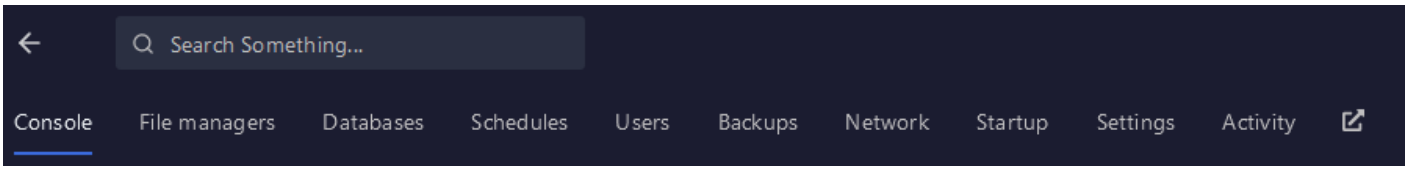

> You are also able to delete the additional port, or make it the primary port for your server for players to connect with.

Step 7

On the top navigation, select the **Console** text to navigate to the server console.

Step 8

Restart the server with the stop then start button. Upon completion, the ports will be open.
