How do I change the hostname of my VPS?

Step 1

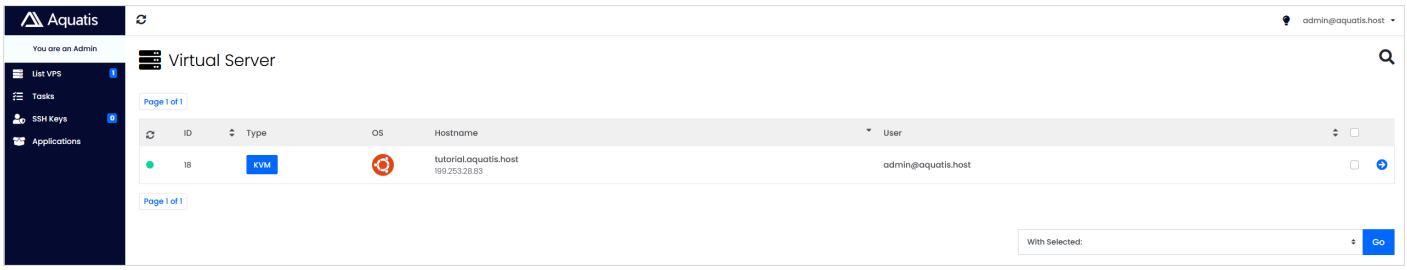

Sign in to the VPS panel.

VPS Panel: https://vps.aquatis.host:4083/

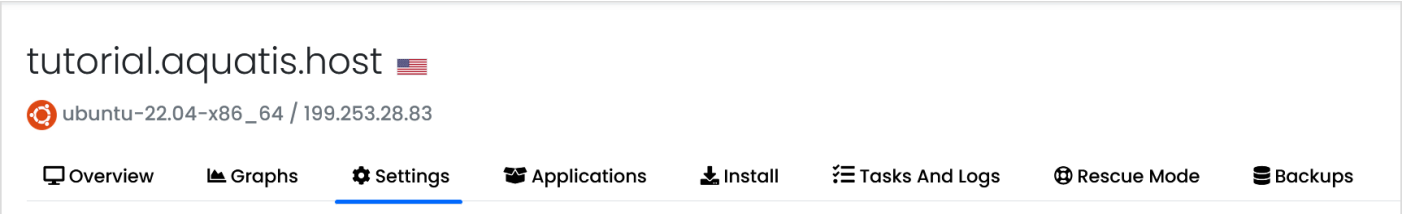

Step 2

Select the **VPS** you wish to control.

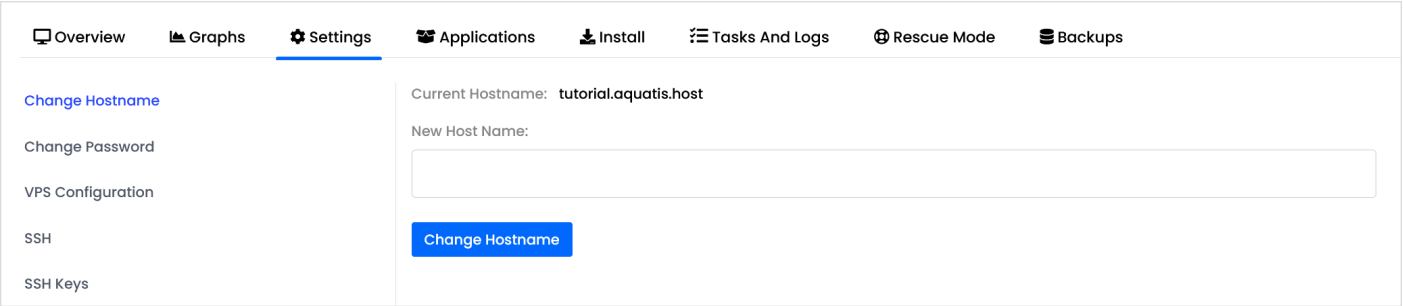

Step 3

On the navigation bar, select the **Settings** button to view the VPS settings.

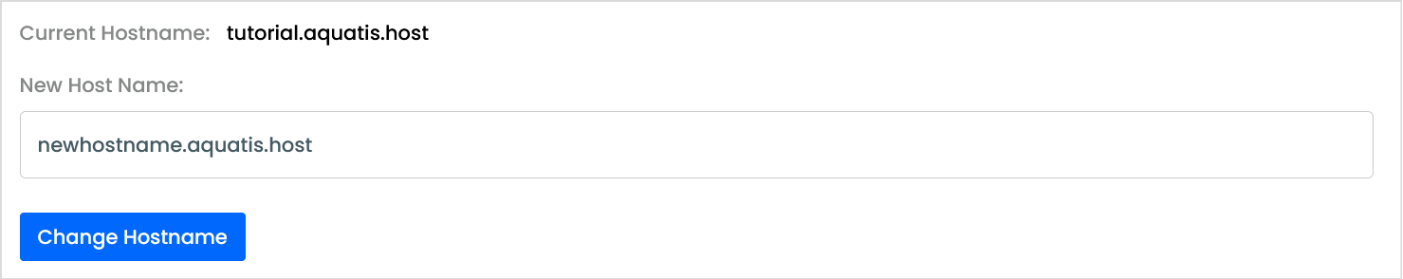

Step 4

The settings page has the **Change Hostname** as the first option.

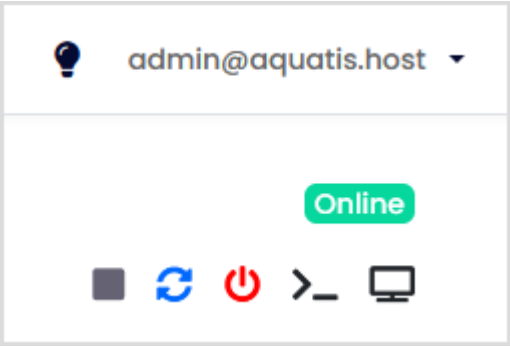

Step 5

Type in the new hostname and click **Change Hostname**.

Step 6

Restart the VPS by selecting the **Blue** restarting option on the top right hand of the screen. This will restart the VPS and apply the new hostname.
