

How do I create a manual backup for my VPS?

Step 1

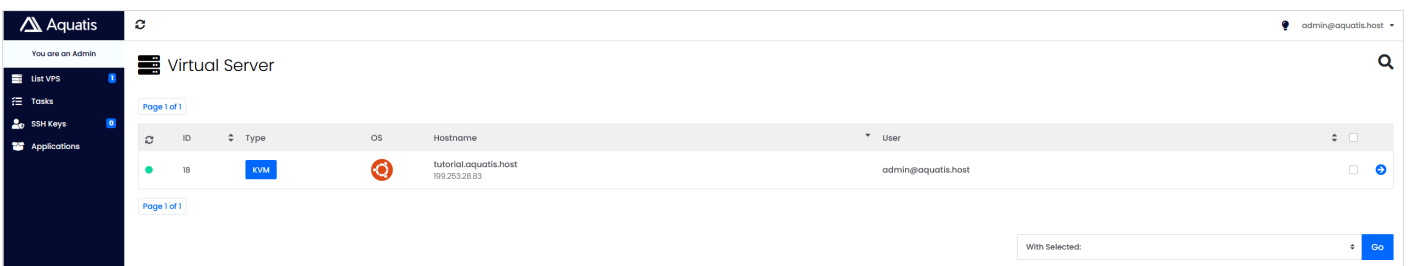

Sign in to the VPS panel.

VPS Panel: <https://vps.aquatis.host:4083/>

Step 2

Select the **VPS** you wish to control.

Step 3

On the navigation bar, select the **Backups** button to view the Backups menu.

Step 4

Select the **Backup Now** button to start the backup process.

In this example, this VPS does not have any backups yet.

Backups list of VPS ID: 361

The dates for which backups of this VPS are available are listed below. You can restore or delete them accordingly.

Show Entries Search:

Backup Date	Action
No data available in table	

Showing 0 to 0 of 0 Entries [Previous](#) [Next](#)

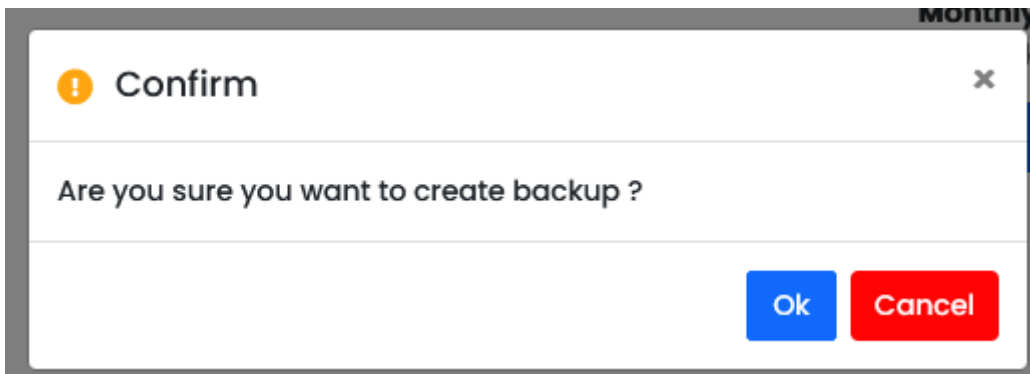

Monthly Backups Used: 0 / ∞
Monthly Restores Used: 0 / ∞
Current Cycle: 01-08-2023 to 31-08-2023

[Backup Now](#)

Step 5

Select **Ok** to initiate the backup process in the background.

This can take 1-10 minutes to complete.
