How do I restore a backup for my VPS?

Step 1

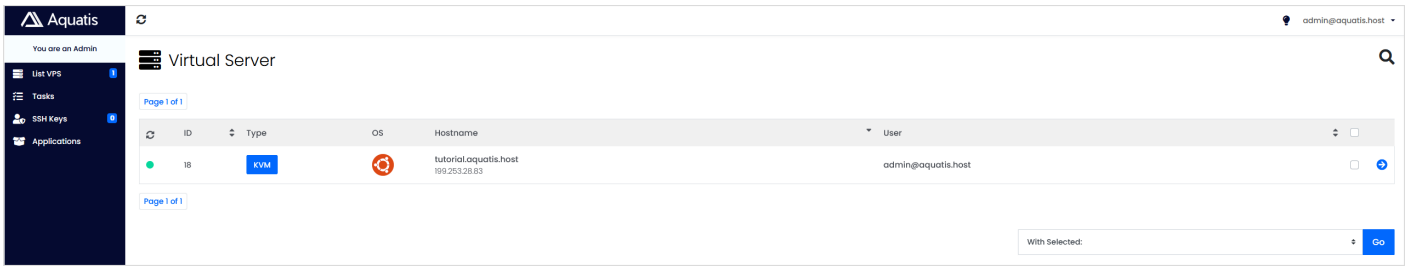

Sign in to the VPS panel.

VPS Panel: https://vps.aquatis.host:4083/

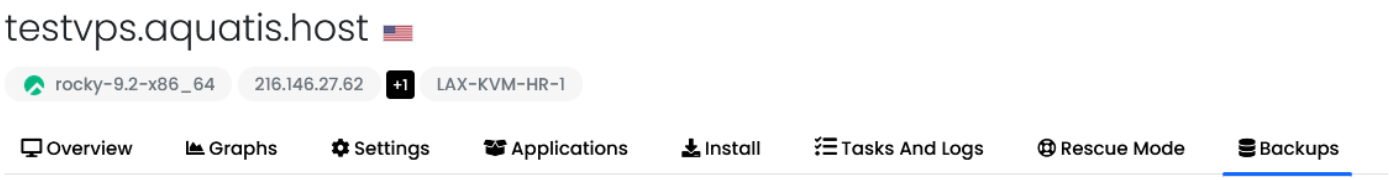

Step 2

Select the **VPS** you wish to control.

Step 3

On the navigation bar, select the **Backups** button to view the Backups menu.

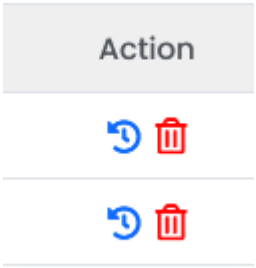

Step 4

Listed below are 2 VPS backups for the VPS we have selected above.

On the left-hand side, it will show the date and time when the backup was created, on the right-hand side are the actions available per backup.

Name	Action
Restore	Selecting this will restore the VPS to that mirror.
Delete	Selecting this will delete the VPS mirror permanently.

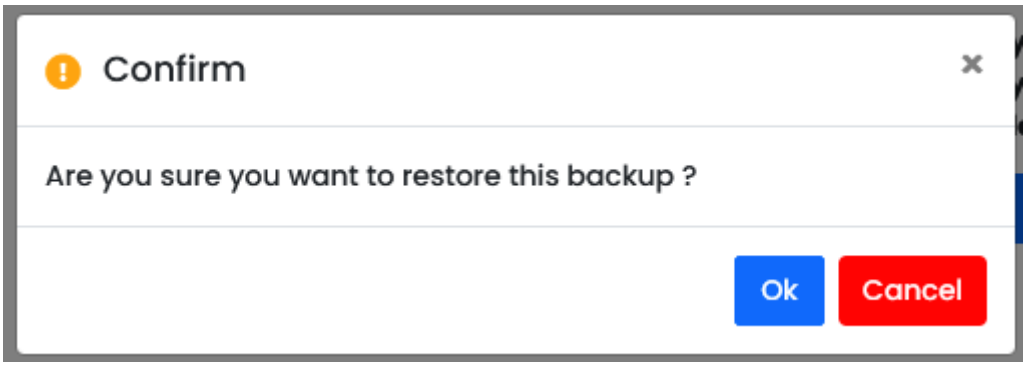

Select the restore action for the date and time you want to back up.

Step 5

Select **Ok** to initiate the restore process in the background.

> This can take 1-10 minutes to complete.

> This will permanently delete all data on your VPS at the moment and restore all data from the date and time you selected.
