How do I start/stop/restart VPS?

Step 1

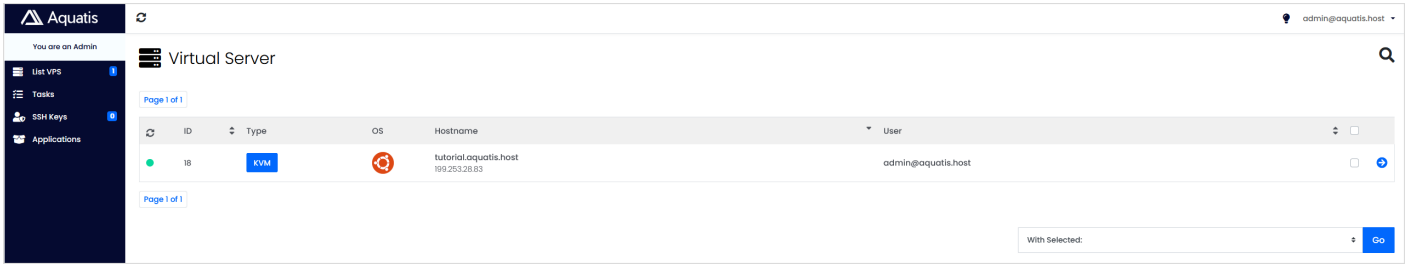

Sign in to the VPS panel.

VPS Panel: https://vps.aquatis.host:4083/

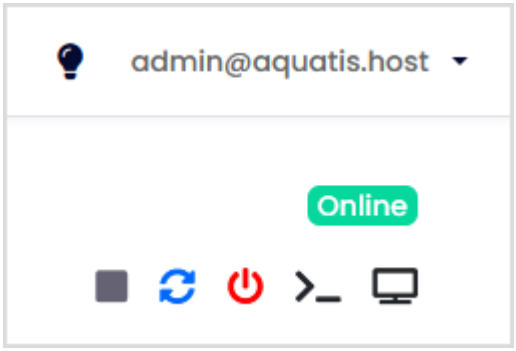

Step 2

Select the **VPS** you wish to control.

Step 3

On the top right **select** the button of the action you wish to perform.

Button	Action
Start/Stop the VPS	This will start the VPS if it's powered off and will stop the VPS if it's powered on.
Restart the VPS	This will turn off the VPS and turn it back on right after.
Poweroff the VPS	This will power off the VPS and not automatically turn it back on.
Connect to VPS via SSH	This button would allow you to connect to the VPS with an online SSH session.
Connect to VPS via VNC	This button would allow you to connect to the VPS with an online VNC session.
